

ABB drive services

Reconditioning service

Restore your drives to their original condition

ABB's dust-free drives service workshops offer the perfect environment to fully maintain your drive. From spare part replacement to software upgrades, all work is full-load tested, backed by a one-year warranty.

Extended drive life

Reconditioning service helps your drive regain full functionality. We help you to exceed your operational targets and to continue operating profitably.

One-year warranty

ABB provides a one-year warranty for the whole drive or module.

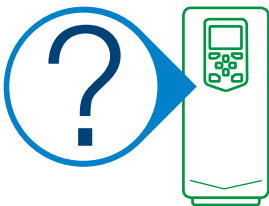

Genuine spare parts

Using genuine ABB parts ensures your drive operates as designed. The drive or module is repaired according to the original specification.

High-standard service worldwide

A global network of ABB authorized drives service workshops offer a consistent approach to the high-quality maintenance process.

Is my drive suitable?

We offer the Reconditioning service for all low voltage and medium voltage drives that are in active or classic phase of their life cycle. Check the life cycle phase of your drives and service availability with your ABB contact.
